THE UNIFIED TRANSIT TARIFF UNDER THE AGREEMENT
CONCERNING INTERNATIONAL RAILROAD FREIGHT TRANSPORT

1. GENERAL PROVISIONS

1. This Tariff applies to freight shipments in railroad transit through countries whose railroads participate in the Agreement on International Freight Shipping (SMGS) in the following cases:

- (a) When shipments are made between countries whose railroads participate in SMGS;
- (b) When shipments are made from countries whose railroads participate in this Agreement to countries whose railroads do not participate in the agreement, or vice versa.

In the cases indicated in clauses (a) and (b), the Unified transit tariff also applies to transshipments through port railroad stations that come under the SMGS.

2. The Unified Transit Tariff contains:

- (a) Instructions on the methods of legalizing freight shipments;
- (b) Instructions on the methods of calculating shipping costs and supplemental charges;
- (c) Supplemental charges;
- (d) Tables of transit distances and directions along which transshipments of freight may be made;
- (e) Nomenclature and classification of freight;
- (f) Calculation tables of shipping costs.

3. This Unified Transit Tariff was written in the Russian language and translated into German and Chinese.

In case of a discrepancy in the texts, the Russian language version shall be considered authoritative.

III. METHODS OF PUBLISHING CHANGES AND
SUPPLEMENTS TO THE UNIFIED TARIFF

1. Changes and supplements to this Tariff shall be published in accordance with Article 36 of the SMGS in the following official publications:

In the Albanian People's Republic

In the Bulgarian People's Republic: Tarifni Izvestiya

In the Hungarian People's Republic: Kozlekedesi Kozlony

In the Democratic Republic of Vietnam: Bac Duong Sat

In the German Democratic Republic: Tarif und Verkehrsanzeiger (TFA), Berlin

In the Chinese People's Republic: Te-lu Shan-u Chuan-kan

In the Korean People's Democratic Republic: Kethonson Unim

Yogym Kudion Konbo

In the Mongolian People's Republic: Sayd Naryn Zoviolbyn

Togtooluudyn Emkhetgel

In the Polish People's Republic: Dziennik Tarif i Zazhondzon Komunikaciynykh

In the Rumanian People's Republic: Revista Oficiala a Ministerului Kulturii si Educatiei

In the Union of Soviet Socialist Republics: Sbornik Pravil Perevozok i Tarifov Zheleznodorozhnogo Transporta Soyuza SSR

In the Czechoslovak Republic: Tarifni Vestnik

III. METHODS OF LEGALIZING FREIGHT SHIPMENTS

ON THE RAILROADS PARTICIPATING IN SMGS

1. The shipment of freight by railroads participating in SMGS is legalized by SMGS documents covering the entire route, station of origin and receiving station, in the direction specified in Section IX of this Tariff.

The shipper must indicate in the bill of lading, under the column "border stations en route of this shipment," the exit and entry border stations of all railroads used for the shipment.

2. When freight is shipped to the Chinese People's Republic via the Sary-Ozek station, the shipper shall indicate that station in the bill of lading as the point of destination, and name a definite person (expeditor) as the recipient who is to receive the goods for further transshipment by truck.

3. Shipping charges shall be collected:

- (a) From the shipper, at the station of origin, for moving the goods on the railroads of the country of origin;
- (b) From the recipient of the shipment, at the destination point, for moving the goods on the railroads of the receiving country;
- (c) For shipments made by transit railroads: from the shipper at the station of origin or from the recipient at the destination point;
- (d) From the shipper, at the station of origin, for moving the goods on the railroads of the country of origin, and transit railroads, en route to the Chinese People's Republic via the Sary-Ozek station.

4. The shipper, who assumes the shipping charges in connection with the transit railroads, must make the following notation on the bill of lading under the column "cost of shipment on transit roads accepted by the shipper:" "I assume the cost of shipment... on the transit railroads." In that notation the shipper shall indicate the specific transit railroads carrying the shipment for which he assumes the charges.

If the shipper does not assume the shipping costs involved in the use of any transit railroads, no notation shall be made in the mentioned column. Shipping costs not assumed by the shipper shall be chargeable to the recipient, and shall be collected from him at the destination point.

5. When the shipping costs of moving freight by transit railroads must be paid by the shipper -- in accordance with Section III, Subsection 3, Clause (d); Section IV, Subsection 10, Clauses 1 and 2; and Section V, Subsection 4 of this Tariff -- such costs shall be collected from him at the station of origin and shall not be charged to the recipient.

IV. METHODS OF LEGALIZING FREIGHT SHIPMENTS ACROSS
LAND FRONTIERS INTO COUNTRIES WHOSE RAILROADS DO NOT
PARTICIPATE IN THE SMGS, AND VICE VERSA, AND SHIPMENTS
THROUGH COUNTRIES WHOSE RAILROADS DO NOT parti-
cipate in the SMGS

1. Shipments of freight across land frontiers from countries whose railroads participate in the SMGS to countries whose railroads do not participate in SMGS, and back, are classified as follows:

(a) No other agreement between the railroads of the countries

of origin and destination of such shipments whereby freight could be covered by shipping documents;

- (b) An agreement between the railroads of the countries of origin and destination of such shipments whereby it is possible to ship freight under covering shipping documents from the point of origin to the destination.

2. In the case mentioned in 1 (a), freight shipments from a country whose railroads participate in the SMGS to a country whose railroads do not participate in the SMGS shall be legalized by SMGS documents which are valid to the exit border station of the last railroad participating in the SMGS (these stations are listed in Section IX of this Tariff).

The shipper shall indicate the particular border station in the bill of lading column entitled "Receiving station and railroad." The name of the receiving station shall be followed by the shipper's notation stating "for transshipment by railroad facilities to station..." (indicating the final receiving station and railroad). In the bill of lading column entitled "Recipient and address" the shipper shall indicate "c/o Station Master," and in the column entitled "Special remarks by shipper" the actual recipient of the freight, at the final receiving station and his address shall be entered. Acting on the basis of these notations, as an authorized agent, the border station assumes responsibility for shipping the freight to the final receiving station under a bill of lading conforming to international communications.

In the column of the new bill of lading entitled "Station and railroad of origin" the border station shall indicate its name, and in the column "Shipper and address" the name of the shipper shown in the original bill of lading and his address as well as the station and

country of origin shall be entered. The border station shall attach the original SMGS bill of lading to the new shipping documents. The following notation shall be made on the front part of the bill of lading and in the upper left corner of the waybill: "Bill of lading No...
...dated..... enclosed"

Shipments of freight in the reverse direction, that is from a country whose railroads do not participate in the SMGS to a country whose railroads do participate in the SMGS, shall be legalized by appropriate international communications documents which are valid to the border station of entry of the first transit railroad participating in the SMGS (these stations are listed in Section IX of this Tariff).

In the bill of lading the shipper shall refer to that border station as the receiving station and to the station master as the recipient. The shipper shall also indicate in the bill of lading the actual recipient of the freight at the final receiving station and his address. Acting on the basis of these instructions, the border station receiving the shipment shall assume responsibility as the shipper's authorized agent and forward the freight to its final receiving station under SMGS shipping documents. In the new bill of lading, in the column entitled "Station and railroad of origin," the border station shall enter its name, and the column "Shipper and address" shall contain the name of the original shipper and his address as well as the name of the station and country of origin. The border station shall attach the original bill of lading to the new SMGS shipping documents. The following notation shall be made in the new bill of lading, in the left corner of the front part, under the column "Loading permitted," and in the upper left corner of the waybill under the column "Railroads": "Waybill No.....dated..... enclosed."

3. If an SMGS railroad, used for transit shipment, has no agreement with the railroads of the country of destination, the shipment may be accepted only if addressed to an expeditor at the station bordering on that country.

4. If shipments are made from a country whose railroads participate in the SMGS to a country whose railroads do not participate in the SMGS, and vice versa, as specified in Subsection 1, Clause (b), such shipments shall be legalized by appropriate international communications documents for the entire route between the station of origin and the receiving station.

If, however, the shipment of freight from a country whose railroads participate in the SMGS to a country whose railroads do not participate in SMGS is made by railroads participating in the SMGS and under SMGS shipping documents, the shipper shall refer in the bill of lading to the exit border station of the last transit railroad participating in the SMGS as the recipient. In such cases the shipper shall contract beforehand with the expeditor and the transit railroads with regard to the freight shipped to his address and with regard to other commercial questions connected with the further shipment of the freight to countries whose railroads do not participate in the SMGS.

5. If the railroads used for the shipment include railroads which do not participate in the SMGS, and if all these railroads come under a different agreement on international communications, the shipments shall be legalized by documents under that agreement for the entire shipping route.

6. Freight shipments consigned to Iran shall be legalized by SMGS shipping documents. The shipper shall be indicated in the bill of lading column "Receiving station and railroad," Julfa station of

the USSR railroads. The name of the station in the bill of lading shall be followed by the notation "for transshipment by rail to Julfa station of the Iranian railroads."

In the bill of lading column entitled "name and address of recipient" the shipper shall indicate "Station master, Julfa station, USSR railroads," and in the column entitled "Special statement by shipper" the actual recipient of the freight at the Iranian Julfa station and his address shall be indicated.

Shipments of freight from Iran shall be legalized to Julfa station USSR by shipping documents under the Iranian domestic railroad system. A notation shall be made in the bill of lading to the effect that the freight shall be transshipped by the railroad's facilities to the final receiving station, and the actual recipient of the freight at that station shall be indicated.

Shipments going to Iran through Ashkhabad station of the USSR railroads shall be addressed to the expeditor at that station. In the reverse direction, the freight must be submitted to the Ashkhabad station expeditor for transshipment.

7. When freight shipments are made from countries whose railroads participate in the SMGS to Afghanistan, such shipments shall be addressed to the expeditor at Termez or Kushka station for transshipment by other means of transportation. In the reverse direction, the freight shall be submitted by the Kushka or Termez station expeditor for further shipment.

8. Transit shipments on USSR railroads originating in Finland and consigned to countries whose railroads participate in the SMGS, and vice versa, shall be legalized by SMGS shipping documents in the

manner specified in Subsection 2 of this Section. Freight shipments from Finland shall be carried only by USSR freight cars.

9. The shipping charges for transit freight carried by railroads participating in the SMGS under the conditions outlined in Subsections 4 and 5 shall also be calculated according to this Tariff.

10. Shipping charges shall be collected:

1. For freight shipments legalized by SMGS shipping documents if the transshipment is made through the border station master (§2):

(a) When shipped to countries whose railroads do not participate in the SMGS

For the railroad shipment in the country of origin -- from the shipper at the station of origin;

For shipment by transit railroads participating in the SMGS -- from the shipper at the station of origin, in addition to the railroad freight charges in the country where the transshipment is made. The cost of shipping the freight by these railroads may be paid by the shipper at the station of origin or collected from the recipient at the final receiving station;

For shipment by railroads not participating in the SMGS -- from the recipient of the freight at the receiving station;

(b) When shipped from countries whose railroads do not participate in the SMGS

For shipment by railroads not participating in the SMGS -- from the shipper at the station of origin;

For shipment by railroads participating in SMGS — from the recipient at the receiving station.

2. In the case of freight shipments legalized by shipping documents and transshipped by an expediter (Subsections 3, 4, and 7) and freight shipments to and from Iran (Subsection 6), the charges for shipping the freight from the shipping station of the railroad participating in the SMGS to the border station, where the transshipment is made, shall be collected from the shipper at the station of origin, and in the case of shipments going in the reverse direction, from the recipient of the freight at the receiving station.

3. In the case of shipments legalized by shipping documents under other agreements on international communications, charges shall be handled in the manner prescribed by these agreements, and the shipping charges calculated in rubles shall be recalculated in the currency of the given country.

V. METHODS OF LEGALIZING FREIGHT SHIPMENTS THROUGH PORTS OF TRANSIT RAILROADS

1. Shipments of freight from countries whose railroads participate in the SMGS to other countries (regardless of whether their railroads come under the SMGS) through ports connecting with transit railroads participating in the SMGS, and in the reverse direction, shall be legalized by SMGS shipping documents only to or from the port station of the transit railroad station.

2. In shipping freight from countries whose railroads participate in the SMGS, the shipper shall indicate in the SMGS bill of lading the appropriate port station mentioned in this Tariff as the receiving station; he shall also indicate a definite expediter who, acting

as a recipient, is to receive the freight from the railroad and tranship it by water transport.

The shipper shall make the following notation in the bill of lading column entitled "Special remarks by shipper:"

"To be shipped by water transport to..." (indicating country of destination).

In shipping freight from a port railroad station, the expeditor shall make the following notation in the bill of lading column entitled "Special remarks by shipper:" "Brought by water transport from..." (indicating country of origin of shipment).

3. Shipments from or to such port railroad stations by water transportation shall be made according to the tariff regulations applying to such shipments.

b. Charges for freight shipment from a station of origin of a SMGS railroad to the port station shall be collected from the shipper at the station of origin, and for shipments moving in the reverse direction from the recipient of the freight at the receiving station.

Fees and other charges payable at the port stations (Section VIII, Subsection 7) shall always be collected from the expeditor.

Charges for freight shipments on transit railroads shall be calculated under the provisions of this Tariff.

5. In the case of freight shipments from countries whose railroads participate in the SMGS to other countries (regardless of whether their railroads come under SMGS), and vice versa, by transit railroads participating in the SMGS, the charges for the transit shipments shall be calculated under the provisions of this Tariff and paid by the

expediter at the entry or exit port railroad station -- if the freight is brought to the transit railroad, or removed from it, by water transport.

In the case of freight shipments to and from Iran through Port Poti, all shipping costs including the charges indicated in Article 12, Clause 2; Article 13, Clauses 4 and 6; Article 19, Clause 14; and Article 20, Clauses 2 and 6 of the SMGS, shall be paid by the expediter at Poti. Such shipment shall be legalized by shipping documents under the domestic railroad system of the USSR to the Julfa railroad station, Iran, and consigned to a definite recipient at that station.

If the port railroad stations belong to the railroad system of the same country, the freight shipment shall be legalized by the shipping documents used by that country's railroads.

6. Freight shipments from countries whose railroads participate in the SMGS to countries whose railroads do not participate in that Agreement, or vice versa, through port stations of railroads participating in the SMGS, may be legalized by documents under the appropriate international communications if the railroads of the country of origin or destination and the transit countries have a different agreement on direct communications.

Charges for freight shipments by transit railroads belonging to the SMGS shall, in this case, be calculated under the provisions of this Tariff.

7. If freight shipments from countries whose railroads participate in the SMGS to countries whose railroads do not come under the SMGS, and vice versa, are carried by transit railroads participating in the SMGS and those not participating in it, and if all the railroads

used for these shipments come under some other agreement on direct international communications, such shipments shall be legalized for the entire route by documents under the other international agreement.

In this case, the shipping charges connected with the transit railroads participating in the SMGS shall be calculated under the provisions of this Tariff.

8. If the freight scheduled to be shipped by water transport is not removed within six months from the time of its arrival in port, the railroad owning the port station shall collect from the recipient (expediter) the difference between the shipping cost charged by it according to the domestic rates and the charges collected under the provisions of this Tariff.

If such freight is shipped to another country across a land frontier within 6 months after its arrival in port, the shipping costs charged by the railroad owning the port station shall be calculated under the provisions of this Tariff.

VI. CLASSES AND RATES UNDER THE UNIFIED TRANSIT TARIFF

1. The following classes and rates are established by this Unified Tariff:

Class Number	Rate per ton km (in kopeks)	Class Number	Rate per ton km (in kopeks)	Class Number	Rate per ton km (in kopeks)
1	8	6	4	11	3.5
2	7	7	3.5	12	7.5
3	6	8	3	13	22.5
4	5	9	2.5	-	-
5	4.5	10	2	-	-

On these rates are based the calculation tables used for computing the charges for freight shipment by transit railroads.

VII. TARIFF REGULATIONS.

CALCULATION OF SHIPPING COSTS

Carload and Less Than Carload Shipments

1. International freight shipments carried by transit railroads participating in the SWGS shall be made by carload and less than carload shipments.

A carload shipment means freight shipped on a single bill of lading and carried in a separate car.

A less than carload shipment means freight shipped on a single bill of lading but not bulky or heavy enough to require a separate car.

In the case of a less than carload shipment, the station of origin shall make the notation "less than carload shipment" on the bill of lading and the waybill under the column title "Loaded."

Should this notation be absent, at the border or receiving stations, the station noting the missing notation must insert it and certify it with its own stamp.

Rounding Off the Shipping Weight

2. The actual weight of the freight used for computing the shipping charges and supplementary charges, shall be rounded off to a full 100 kg.

Various types of freight coming under the same tariff class

shall be treated as one kind of freight and the total weight rounded off to a full 100 kg.

Calculation of Shipping Cost

3. The following shall be used for calculating the cost of freight shipments by transit railroads participating in the SMGS:

- (a) Tables of transit distances (Section IX) showing the tariff distances of freight shipments by transit railroads from entry to exit border stations (national frontiers) or to and from port stations;
- (b) Nomenclature and classification of freight (Section X) which are used for determining the tariff class and which must be applied to the shipment under consideration, as well as the computed weight norm;
- (c) Tables of shipping costs (Section XI) which are used to determine the charges for freight shipments.

4. The calculation tables shall be based on the following zones:

from 5 to 1,054 km	on 10 km zones
from 1,055 to 6,050 km	on 100 km zones
from 6,051 and over	on 200 km zones

Transitional zones of 95 km and 150 km shall be used for distances of 1,055-1,149 km and 6,050-6,200 km.

The shipping charges indicated in the calculation tables shall be based on the average distance of each zone and rounded off to a full kopek, with anything over 0.5 kopek considered as a full kopek and anything under 0.5 kopek deleted from the bill.

Charges for freight shipments shall be computed on the basis of the rates shown in the calculation tables for the particular zone lying on the route of a given shipment.

5. Shipping charges and supplementary charges connected with shipments by transit railroads shall be computed on the basis of the rates of this Tariff which are in force on the day the freight is shipped by the railroads of a given country.

When shipments are made through port railroad stations under the terms of Section V of this Tariff, the SMGS railroad owning that station shall be considered a transit railroad.

Shipping charges and supplementary charges connected with transit shipments by the railroads of the country of origin and the country of destination shall be computed according to the domestic regulations and tariff rates of these countries in force, in the country of origin on the day the dated stamp is affixed to the bill of lading and, in the country of destination, on the day the shipment is received by its railroad.

In certain cases of transit freight shipments, the SMGS railroads concerned may agree on the use of auxiliary instruments, in the form of supplements to the Unified Transit Tariff, containing shipping rates for transit railroad distances, based on the Unified Transit Tariff, and shipping rates applying to the railroads of the countries of origin and destination based on the domestic tariffs of those railroads. It shall also be permissible to compute and collect shipping charges and supplementary charges for the use of railroads in the country of origin and the country of destination under the provisions, or rates and regulations, of the Unified Transit Tariff.

6. The cost of freight shipments by slow trains shall be computed by multiplying the rate per 100 kg by the number of hundreds of kg contained in the shipment.

In the case of shipments by fast trains, this amount shall be increased by 100%, and in the case of shipments by passenger trains (carload shipments included in passenger trains), this amount shall be increased by 200%.

Shipping Cost Per Carload

7. The cost of carload shipments by cars up to and including 25 t capacity shall be calculated and collected, for the entire shipping route, for the actual weight of the freight but not less than the rated weight norms indicated in the freight nomenclature and classification of this Tariff, subject to the following:

(a) If the freight nomenclature in the column titled "rated weight norms..." is indicated by the letters "c.c.," the shipping shall be computed and collected for the actual freight weight but not less than the normal carrying capacity of the car provided for the shipment by the railroad station of origin. The normal carrying capacity shall be the carrying capacity indicated on the freight car. If 2 capacity figures are indicated on the car, the lower figure shall be taken as the normal carrying capacity;

(b) If the carrying capacity of the car provided for the shipment is lower than the rated weight norm indicated in the nomenclature and classification of this Tariff, the shipping costs shall be on the actual weight but not less than the normal carrying capacity of the car used for the shipment.

8. When shipments are moved by cars with a carrying capacity exceeding 25 t, the shipping charges shall be calculated in the following manner:

- (a) In the case of shipments for which a "c.c." rated weight norm has been established in the nomenclature, the charges shall be computed and collected for the actual shipping weight but not less than the normal carrying capacity of the car;
- (b) In the case of shipments for which rated weight norms in t have been established in the nomenclature, the charges shall be computed for cars of 20-25 t carrying capacity (inclusive) and shall be increased by the percentages indicated in the table below:

Shipments by cars with carrying capacity	Percent of shipping cost increase
25 to 30 t (inclusive)	50
Over 30 t	100

However, if the charges computed on the basis of the actual freight weight are found to be higher than the charges indicated in the above table, the higher charge shall be collected for the shipment.

If the car provided for the shipment is over 25 t instead of 25 t or less, and the freight loaded by the shipper on the larger car is within the rated weight norms for a 20-25 t car (including the permissible overload), the charges shall be the same as if a 20-25 t car were used for the shipment.

In this case the station of origin shall make the following notation on the bill of lading and the waybill in the column entitled "type of freight": "Large capacity car provided instead of a car of

"less than 25 t capacity." This notation shall be certified by affixing the station's stamp. With regard to shipments from countries whose railroads do not participate in the SNCB, this method of computing shipping charges shall be applied even in cases where the shipping documents bear no notation to the effect that a large-capacity car is used instead of a car of 25 t or less.

If the large-capacity car provided instead of the 25 t car is loaded above the rated weight norms fixed for 20-25 t cars (including the permissible overload), the shipping charges shall be computed on the basis of the actual large-capacity car as indicated in Clauses (a) and (b) of this subsection. No notation shall be made, in this connection, about the use of a large-capacity car instead of a 25 t car, and the notation made in the calculation of shipping charges shall not be taken into account.

If a large-capacity car is used for 2 or 3 carload shipments on different bills of lading, the shipping charges shall be calculated separately for each shipment on the basis of actual weight but not less than the rated weight norms fixed for cars of 20-25 t carrying capacity. If carload shipments are accompanied by less than carload shipments, the shipping charges for each less than carload shipment shall be based on its actual weight plus a 50% increase.

9. The cost of carload shipments shall be based on the carrying capacity of the car carrying the freight from the station of origin.

If the shipment is reloaded at the border station into one or several other cars whose carrying capacity is lower than that of the car provided by the railroad station of origin, the shipping charges shall be based on the carrying capacity of the car or cars into which the shipment is reloaded.

10. Shipments carried on 1,435 mm tracks shall not exceed 17 t per car axle (Article 7, Paragraph 3, of the SICS).

If the load per car axle on any particular railroad section is limited to less than 17 t, the station of origin shall make the following notation in the bill of lading and waybill column entitled "Type of freight:" "On...railroads the load per axle is limited to..."

The cost of freight shipments on 1,435 mm tracks, computed according to Subsections 7 and 8, must not exceed the shipping cost of freight which could be loaded into a car subject to the established per-axle load limits.

In some cases, if the weight of the freight accepted for shipment exceeds the weight that can be loaded into a car subject to the established per-axle load limits, the shipping charges shall be based on the actual weight of the freight.

11. In the case of bulk shipments moved by USSR transit railroads and consigned to the Democratic Republic of Vietnam, the Chinese People's Republic, the Korean People's Democratic Republic or the Mongolian People's Republic, as well as crated freight (for example, grain, oilseed crops, and sugar) shipped in box cars on a single bill of lading in quantities weighing 45-50 t or measuring 75-85 cu m, the charges for the entire shipping route shall be computed on the basis of a 45 or 50 t capacity car, depending on the total capacity of the cars used for this shipment at the station of origin (for example, if the freight is loaded into 3 15-t cars or into 3 cars, 2 of which are 15 t and one 20).

If the total carrying capacity of the cars provided for the shipment is over 50 t, the charges for transit shipment shall be computed on the basis of one 50 t car.

For shipments in the reverse direction, the charges shall be computed on the basis of a single 50 t car.

In the case of transit shipments by USSR railroads of bulk freight in an open train (gondolas and flat cars) to the Democratic Republic of Vietnam, the Chinese People's Republic, the Korean People's Democratic Republic, or the Mongolian People's Republic, and vice versa, the shipping charges shall be computed on the basis of 60 t cars.

12. In the case of shipments covered by fixed tariff rates under classes 11, 12, and 13, the charges shall be computed by multiplying the charge per axle indicated in the tables by the number of axles in the train considering the latter as freight moved by its axles.

Cost of Less Than Carload Shipments

13. Shipping charges for freight specified in the bill of lading and waybill as "less than carload shipment" shall be computed and collected on the basis of the actual shipping weight plus a 50% increase.

If the cost of a less than carload shipment carried in a car in which the shipper loads several other shipments on separate bills of lading (mixed car) exceeds the carload charge based on the rated weight norm (in tons) applying to cars under 20 t, or if the "c.c." charge applying to other freight exceeds the carload cost based on an 18 t car, the lower carload charge shall be collected.

Cost of Mixed Shipments

14. If a single bill of lading is used for the combined shipment of different types of freight (mixed shipment), the shipping charges shall be computed:

(a) For carload shipments, on the basis of the total shipping weight and rated weight norm for the heaviest type of freight in the mixed shipment. In the case of mixed carload shipments the shipper shall indicate in the bill of lading the weight of each type of freight;

(b) For small shipments coming under various tariff rates, on the basis of the actual weight of the particular freight and the appropriate tariff rate, plus a 50% increase.

If the freight to be shipped is identified by its total weight, or is contained in the same packing, the shipping costs shall be based on the actual weight of the shipment and the highest tariff rate applying to any part of the freight, plus a 50% increase.

Type of Freight

15. The shipments indicated in the bill of lading shall be listed under the names listed in the nomenclature of this Tariff, and shipments moved under special conditions and not specified in this nomenclature shall be indicated in the bill of lading under the names listed in Appendix No 4 to the SNCS.

In addition to naming the types of freight in the bill of lading, the shipper shall provide an alphabetical list of goods (Part A) of the nomenclature and classification). If the freight is not itemized in an alphabetical list, the station of origin must indicate

in the bill of lading and waybill the group and item of the industrial nomenclature of the freight (Part (B) of the nomenclature and classification).

Household goods, regardless of whether itemized by the shipper under "household goods" or listed also as separate items comprising the shipment, shall be classified under Group 76, Item 4.

Shipments of freight not itemized in the nomenclature or in accord with Appendix No 4 of the SMGS shall be indicated on the bill of lading according to the railroad regulations in force in the country of origin.

16. Indicated after each item appearing in the alphabetical freight list (Part (A) of the nomenclature and classification) of this Tariff shall be the class of the transit Tariff and the rated freight norms for cars under 20 t and from 20 t up to and including 25 t which are used for computing the shipping costs.

17. If the freight indicated in the bill of lading does not appear in the alphabetical freight list (Part (A) of the nomenclature and classification), it shall be necessary to inspect the freight on the spot, establish the industrial or agricultural nature of the freight, and refer in the industrial nomenclature (Part (B) of the nomenclature and classification) to the group corresponding to that particular industry. If one of the items in that group covers the freight in question, the class and rated weight norm established for that item shall be used.

Should it be found impossible to establish the item applying to this freight, the charges shall be computed on the basis of the highest rate class established for this freight group. In this case,

if a higher rate class applies to several items of this group, the highest rated weight norm of those provided in these items shall be used.

If the freight cannot be classed under any particular group of the nomenclature and classification, the shipping costs shall be computed on the basis of first-class rates for the actual weight but not less than for a 10 t shipment by a car of less than 20 t capacity, and not less than for a 12 t shipment by a car of 20-25 t capacity. The shipping cost of freight carried by cars of over 25 t capacity is computed in the manner provided in Subsection 8 of this Section.

Cost of Shipping Long, Odd-Shaped, and Liquid Freight

18. The shipping cost of long items carried on coupled flat cars shall be computed in the following manner:

Shipments of:	Method of Calculation:
(a) One shipment carried on coupled flat cars of the same or different carrying capacities;	(a) Charges shall be collected for the actual weight on every occupied flat car, but not less than for the rated weight norms of the freight indicated in the nomenclature of freight that can be loaded on flat cars of lower carrying capacity.
	The actual weight of freight to be loaded on each flat car shall be determined by dividing the total shipping weight

into the number of loaded flat cars and rounding off such weight in the manner indicated in Section VII, Subsection 2, of this Tariff;

- (b) long freight loaded on one of the coupled flat cars and reaching beyond the bumpers while the next flat car, serving as a cover, is loaded with other freight.
- (b) charges shall be collected separately for each flat car according to their carrying capacity and the tariff rates applying to the freight.

Note: If the flat car serving as a cover travels empty, the charge for that flat car shall be based on the rates applying to the freight carried on the next flat car and the rated weight norm fixed for the flat car employed as a cover.

19. Charges for the shipment of freight indicated in the bill of lading and waybill as odd-shaped shall be computed under the provisions of this Tariff and then increased by 100%.

20. Charges for shipping liquid freight shall be computed:

- (a) For crated shipments, under the general regulations governing freight shipments (Subsections 7-10 of this Section);
- (b) For shipments carried in railroad tank cars, on the basis of the actual weight.

Cost of Shipping by Freight Owner's Railroad Cars

21. Charges for freight shipments carried by the freight owner's cars (owned or leased) shall be computed under the provisions of the tariff covering the shipment in question.

There shall be no charge for deadheading such cars (after unloading or on the way to be loaded).

Cost of Shipping Perishable Goods, Livestock, Fish, and Poultry

22. Livestock, fish, and poultry, listed in Appendix No 1, to be shipped over distances of more than 1,800 kilometers, shall be carried by fast trains only.

Perishable goods carried by transit railroads shall be provided with ventilation and refrigeration facilities whenever necessary.

23. Shipping charges for perishable goods carried in ice-cooled cars and refrigerated trains shall be computed under the general regulations.

The freight owner's ice and other safety facilities loaded with the freight shall be carried free of charge.

There shall be no charge for handling cars to be included in refrigerated trains, for cars used by the train's service personnel, or for deadheading.

The Guard's Railroad Fare

24. The railroad fare of the guard accompanying the shipment shall be paid on the basis of 3 rubles per 100 km of the shipping route. Distances of less than 100 km of shipping route in each country shall be considered as 100 km.

The technical personnel of the refrigerated train of the transit railroads shall be carried free of charge.

Cost of Shipping Corpses and Urns Containing Ashes

25. The charges for shipping coffins with corpses in separate cars of

(a) Fast freight trains, shall be computed according to class 13, per axle of the occupied car;

(b) Passenger trains, according to class 13, plus a 100% increase.

The same calculation shall be used to determine the charges for urns containing ashes and carried in separate cars.

Charges for shipping urns with ashes not in separate cars shall be computed on the basis of Class 1 rates plus a 50% increase when carried by slow trains, and on the basis of Class 1 rates plus a 200% increase when carried by fast trains, with the urn weighing 100 kg.

Cost of Carrying Shipper's Transport Equipment

26. The shipper's transport equipment (tarpaulins, grain shields, etc) shall be carried free of charge if the weight of such equipment is indicated in the shipping documents separately from the freight weight.

Cost of Shipping Goods in Containers

27. The cost of shipping goods in containers shall be based on the actual weight of the goods plus a 50% increase in the computed cost. The charges for shipping different classes of goods in a single container shall be computed on the basis of the total weight of the shipment and the highest rate applying to any of its composite parts.

There shall be no charge for carrying empty containers by transit railroads.

Tariff Unit of Account

28. The unit of account used for calculating shipping costs and additional fees shall be the ruble.

The collection of shipping costs, additional fees and fines calculated in rubles from the shipper or recipient shall be made in local currency according to the daily rate of exchange and the place of payment.

Supplementary and miscellaneous charges, incurred in transit and computed under the terms of domestic tariffs, shall be indicated in the bill of lading and waybill in rubles and followed by a notation of the exchange rate of the local currency on the day the charges are incurred.

VIII. SUPPLEMENTARY CHARGES

1. The following rates shall be charged for reloading freight from cars on 1,435 mm tracks onto cars using 1,524 mm tracks, and vice versa:

- (a) For reloading crated and piece goods, 6 rubles per t;
- (b) For reloading bulk and loose goods, 5.50 rubles per t;
- (c) For transferring liquid into other containers and heating it in wintertime, 4 rubles per t;
- (d) For reloading goods itemized in Article 5, Clause 3, Paragraph 3 of the SMGS, the charges shall be based on the

existing domestic rates of the railroad performing the reloading, and if no such rates are available, the actual cost is used;

- (e) For shifting pairs of car wheels, 40 rubles per axle.

The cost of shifting pairs of wheels of mixed-freight cars containing several shipments shall be applied separately to each bill of lading at the rate of one ruble per 100 kg of weight, with weights less than 100 kg considered as full 100 kg;

- (f) For unloading a full container with a gross weight of 2.5 t or less, 5 rubles, and for containers weighing over 2.5 t, 10 rubles.

2. The charges for declaring the value of the freight carried by a fast or slow train shall be 0.25 rubles per 100 rubles of declared value regardless of the shipping distance. Values under 100 rubles shall be considered 100 rubles. This charge shall be collected separately for each railroad.

3. To cover expenses connected with the customs inspection of freight carried, each railroad shall collect a charge (only once) of 2.40 rubles per carload shipment, and 1.20 rubles per less than carload shipment.

4. Charges for ferrying goods across the Danube between the border stations of Kalafat and Vidin shall be computed on the basis of the rates shown below (with the exception of locomotives resting on their own axles which are not accepted for ferrying. The maximum weight of carload shipments carried by 2-axle cars that may be ferried

shall be 16 t per axle. Four-axle cars may be ferried under a preliminary agreement with the Rumanian and Bulgarian railroads):

Classes of the Unified Transit Tariff Charge in kopeks per 100 kg

(a) Less than carload shipments regardless of class of freight	75
(b) Carload shipments for:	
freight, first and second class	75
freight, third class	62
freight, fourth class	57
freight, fifth class	50
freight, sixth class	48
freight, seventh class	45
freight, eighth class	41
freight, ninth class	38
freight, tenth class	35
freight, eleventh class)	
freight, twelfth class)	477 kopeks per axle
freight, thirteenth class)	

5. The railroad shall collect a charge of 40 rubles per car, regardless of its carrying capacity, to cover the equipment, appliances, and accessory loading requisites (counters, wire, nails, gang planks, wadding material, etc) it provides for reloading freight at the border stations.

6. Charges for refrigerated shipments carried in refrigerator cars, and for fuel, when heated cars are used, shall be computed under the provisions of the domestic tariffs as shown in the following tables:

The following charges shall be collected by the railroads of the CPR [Chinese People's Republic] and the USSR for the fuel they furnish in connection with shipments carried in heated cars: 20 rubles for the first 250 km and 10 rubles for each additional 250 km.

TABLE OF CHARGES FOR REFRIGERATED TRANSPORTATION
ON THE RAILROADS OF THE PEOPLE'S REPUBLIC OF BULGARIA,
THE HUNGARIAN PEOPLE'S REPUBLIC, THE GERMAN DEMOCRATIC
REPUBLIC, THE RUMANIAN PEOPLE'S REPUBLIC, THE
POLISH PEOPLE'S REPUBLIC, AND THE CZECHOSLOVAK REPUBLIC

1. Charge for ice supplied for refrigerator cars of carrying capacity regardless of the shipping distance -- 100 rubles per car.
2. Charge for fuel furnished by the railroad for heating cars regardless of carrying capacity or shipping distance - 30 rubles per car.

Note. The charges for refrigerated transportation given in this table shall be charged when these railroads actually supply the cars with ice or fuel.

Cars shall be supplied with ice or fuel on the transit railroads at the following points:

On the railroads of the People's Republic of Bulgaria: at the Ruse Raspredelitel'naya, Vidin, and Tolbukhin stations;

On the railroads of the Hungarian People's Republic: at the Szeg and Hegyeshalom stations;

On the railroads of the German Democratic Republic: at the Dresden Friedrichstadt, Halle (Saale) Main, Magdeburg Main, Port Gasnig, Warnemunde, Wismar, and Wittenberg stations;

On the railroads of the Rumanian People's Republic: at the Sokol and Kurtich stations;

On the railroads of the Polish People's Republic: at Jurawitea station and at the port stations of Gdansk, Gdynja, and Stettin;

On the railroads of the Czechoslovak Republic: at stations Cerna-na-Tisou, Brzeslau, and Decin Glavni Madvashi stations.

7. Other charges originating at the port stations, and not provided for in this Tariff, shall be collected at the effective rates of the railroad to which the particular port station belongs.

8. When freight is shipped in containers weighing 2.5 t (gross), the following charge shall be made per container (separately for each transit railroad):

Distance in km	Charge in rubles
Up to 400	6
401 to 500	9
501 to 600	11
601 to 700	12
701 to 800	13
801 to 900	14
901 to 1,000	15
1,001 to 2,000	22
over 2,000	30

For containers weighing over 2.5 t gross the charge is doubled, and in the case of containers weighing less than 2.5 t gross the charge is reduced by one half.

9. The charges listed in this section shall be collected from the shipper or recipient depending on who pays the shipping costs,

with the exception of charges originating at port stations (Subsection 7), which are to be paid by the expeditor.

Appendix No 1 to Subsection 22, Section VII

LIST OF PERISHABLE GOODS SHIPPED OVER TRANSIT
DISTANCES OF OVER 1,800 KM BY FAST TRAINS ONLY

1. Fresh and canned vegetables and mushrooms (except sun-cured and dried): eggplants, cantaloupes, tomatoes, cabbage, potatoes, onions, garden beets, all sorts of salted and pickled vegetables and mushrooms, jam and vegetable mash.
2. Fresh and canned fruit and berries (except sun-cured and dried): fresh fruit and berries, preserved fruit and berries, jam, fruit, and berry mash and paste.
3. Meat products (including dressed and wild fowl) and animal fats: animal meat in any form, lard and fats, dressed fowl, glands, and subproducts.
4. Dairy products: fresh milk, cream, sour cream, potted cheese, fresh and boiled butter;
5. Eggs;
6. Fish products and lobsters: fresh caviar and fishfry, any type of live, refrigerated, frozen, smoked, salted, or marinated fish and any type of caviar and lobster.
7. Margarine, margoguselin, compound fats, and artificial lard made from vegetable oils.
8. Alcoholic beverages: beer and porter, mead, fruit, and berry wines, grape wine, balmes, grape juices and must, cognac,

brandy, liqueur, and champagne.

9. Non-alcoholic beverages: natural and artificial mineral water and all other non-alcoholic beverages.

10. Fruit and berry jam and syrup.

11. Dry and liquid yeast.

12. Vacuum-packed canned goods.

13. Fresh plants: green trees and bushes, vegetable seedlings, any type of saplings and other planting material, evergreen plants, fresh and cut flowers.

*The name Stettin Port includes the following port stations:

Stettin Glinki, Stettin Goclaw-Towarowy, Stettin Grabovo, Stettin
Port Centralny, Stettin Skolwin, and Stettin Zhelekhowo.

The name Gdansk Port includes the following port stations:

Gdansk Groblja (temporarily not in operation), Gdansk Canal
Kashubski, Gdansk Nowy Port, Gdansk Psherbka, Gdansk Wislany, and
Gdansk Volna Strefa.

The name Gdynia Port includes the following port stations:

Gdynia Dworzec Morski, Gdynia Port Centralny, Gdynia Port Ocsywe,
Gdynia Port Rybacki, Gdynia Port Wenglewy, and Gdynia Volna Strefa.

**The distances indicated for Gdynia Port station also apply
to shipments from and to Gdynia-Towarowa if such shipments arrive by
sea, from beyond the border customs house, or are scheduled to be
shipped out by sea, beyond the border customs house, after they have
been carried by rail.

***Only for shipments of freight unloaded from ships going
through Swinoujsie to Stettin Port, in view of the necessity of con-
trolling the draft of the ships sailing to Stettin.

by special agreement between MAV and ChSD.

X. NOMENCLATURE AND CLASSIFICATION OF FREIGHT

Method of Using Freight Nomenclature and Classification

1. The nomenclature and classification of freight consists of 2 parts.

Part (A) contains an alphabetical list of freight items, and Part (B) the industrial nomenclature of freight items.

The names of freight items in Part (A) are listed in alphabetical order under the letter column corresponding to the first letter of the noun part of the name of the freight item.

In the nomenclature and classification of freight items in the Chinese language, the names are listed according to the increase in number of strokes in the character.

2. Part (A) of the nomenclature and classification of freight contains the following data:

(a) The ordinal number of the freight; (b) the ordinal number of the group and item of the industrial nomenclature; (c) the name of the freight item; (d) the transit tariff class; (e) rated weight norm for cars of under 20-t capacity; (f) rated weight norm for cars of 20-25 t capacity; (g) remarks.

3. If the freight item is listed in the laphabetic nomenclature without any distinctive characteristics (in crates, in liquid containers, dry or liquid goods, solids or powder, dismantled or not dismantled goods, mixed with other materials, enameled, etc) the tariff rate applying to that freight shall be used regardless of the condition or the manner in which it is shipped.

4. If different tariff rates and weight norms have been fixed for different varieties of the same type of freight, if one of these varities is followed by the notation "except those listed separately," care shall be taken to see if the given freight is not

listed separately in the nomenclature of this Tariff, and if different tariff rates and weight norms have not been established for it, before determining the tariff rate and weight norms connected with its shipment.

For example, the nomenclature contains the entry "rubber goods except those listed separately" subject to the first-class rate and to a 10-t and 12-t weight norms. The shipment happens to contain rubber footwear for which a separate provision is made in the nomenclature and which is subject to the second-class rate and the 6-t and 7-t rated weight norms. The latter tariff rates shall be applied to the shipment of rubber footwear.

If, for example, the freight submitted for shipment is listed as "Zinc buckets" for which there is no listing in the nomenclature, this item shall come under the nomenclature listing "Zinc manufactures." If the latter listing is not contained in the nomenclature, the "Zinc buckets" shall be rated as "Nonferrous metal manufactures."

* PART (A)

ALPHABETICAL LIST OF FREIGHT

Nos of groups and items
of industrial nomencla-
ture Part (B)

Rated weight norms
for cars of
following capacity:

Ordinal Numbers	1	2	Type of freight	3	Transit tariff class	4	under	20-25	Remarks

792	4.1	Poppy shells	1	6	7	
793	18.3	Nutshells and fruit stones	8	10	12	
794	7.2	Livestock, small	3	4	5	
795	7.1	Livestock, large	3	4	5	
796	40.1	Rail clamps	7	c.c.	c.c.	
797	31.3	Shale, bituminous	9	12	14	
798	12.2	Cream, fresh and pasteurized	1	8	9	
799	35.3	Mica	8	12	14	
800	68.5	Fire-extinguishing mixture	6	10	12	
801	68.2	Propane and butane mixture	2	12	14	

1	2	3	4	5	6	7
802	12.2	Sour cream	1	8	9	
803	61.2	Wood tar, except that mentioned separately	3	14	16	
804	61.3	Coal tar (pitch)	3	c.c.	c.c.	
805	32.1	Oil tar	6	c.c.	c.c.	
806	61.3	Tar, for bootmaking (pitch)	3	c.c.	c.c.	
807	60.1	Bicarbonate of soda, calcined	6	c.c.	c.c.	
808	60.1	Soda, caustic and crystal	6	c.c.	c.c.	See Appendix No 4
809	21.5	Grapejuice, condensed (bekmes)	3	11	13	
810	22.3	Fruit Juices	4	c.c.	c.c.	
811	64.1	Potassium salt	10	c.c.	c.c.	
812	32.3	Lubricant grease	4	15	16	
813	19.1	Malt	7	c.c.	c.c.	
814	60.2	Glauber salt	6	c.c.	c.c.	
815	34.1	Rock and sea salt	7	c.c.	c.c.	
816	34.1	Table salt	7	c.c.	c.c.	
817	72.5	Compounds and pastes for cleaning metal, glass, etc	1	10	12	
818	72.4	Fire-extinguishing compounds, all kinds	4	10	12	
819	1.1	Soybean	7	c.c.	c.c.	
820	21.1	Ethyl alcohol, denatured	4	12	14	See Appendix No 4
821	61.6	Butyl alcohol	4	12	14	See Appendix No 4
822	61.6	Wood alcohol	4	12	14	See Appendix No 4
823	61.6	Methyl alcohol	4	12	14	See Appendix No 4
824	21.1	Ethyl alcohol	4	12	14	See Appendix No 4
825	65.1	Matches	1	7	8	
826	68.5	Disinfecting and pest exterminating equipment	6	10	12	
827	68.5	Fire-extinguishing equipment	6	10	12	
828	44.2	Transportation equipment, assembled	1	3	3.5	

1	2	3	4	5	6	7
829	44.1	Transportation equipment, disassembled	4	7	6	
830	38.1	Wrought iron	8	c.c.	c.c.	
831	38.2	Steel, straps	8	c.c.	c.c.	
832	38.2	Steel: sheet, rolled, section-shaped and flat	8	c.c.	c.c.	
833	38.1	Steel, crude	8	c.c.	c.c.	
834	43.1	Machine tools for industrial, craft, and handicraft pro- duction and parts of them	3	7	8	
835	37.5	Glass, mirror	2	15	18	
836	37.1	Lamp chimneys, glass	2	6	7	
837	37.5	Aviation glass (plexiglass)	2	15	18	
838	37.5	Automobile glass	2	15	18	
839	37.3	Sheet glass	3	15	18	
840	37.3	Water glass	3	15	18	
841	37.4	Glass articles	2	6	7	
842	40.1	Metal stands	7	c.c.	c.c.	
843	16.1	Mine braces	9	15	18	
844	16.1	Telegraph and telephone poles, wooden	9	15	18	
845	40.1	Poles, cast iron	7	c.c.	c.c.	
846	40.1	Railroad switch points	7	c.c.	c.c.	
847	38.3	Shavings, iron, steel and cast iron	10	c.c.	c.c.	
848	39.1	Shavings, copper	4	c.c.	c.c.	
849	40.1	Tightening devices, threaded	7	c.c.	c.c.	
850	49.1	Woolens	1	11	13	
851	64.1	Superphosphates	10	c.c.	c.c.	
852	61.7	Sealing wax	1	c.c.	c.c.	
853	27.5	Substitutes, tea and coffee	1	10	12	
854	39.1	Antimony, purified, metal	4	c.c.	c.c.	
855	21.5	Grape must	3	11	13	

1	2	3	4	5	6	7
856	38.1	Sheet bar	8	c.c.	c.c.	
857	26.3	Crackers	1	10	12	
858	12.3	Cheese	1	10	12	
859	9.1	Endocrine raw materials	2	8	9	
860	3.1	Tobacco leaf, yellow (for cigarettes) and black (for cigars)	4	9	11	
861	3.2	Tobacco leaf, for makhorka	4	10	12	
862	25.1	Tobacco, except plain, processed (chopped up)	1	6	7	
863	25.2	Tobacco, plain makhorka, chopped up and rubbed	4	10	12	
864	35.2	Talcum, in chunks and ground	10	c.c.	c.c.	
865	57.1	Tare, wooden	8	12	14	
866	12.1	Potted cheese	1	8	9	
867	42.1	Tractor trailers	3	7	8	
868	15.3	Dried fish, all kinds except salted	1	11	13	
869	36.3	Crucibles, graphite	3	c.c.	c.c.	
870	49.2	Canvas and sack cloth	1	10	12	
871	49.1	Cloth: paper, jute, flax, hemp, wool, silk, and cotton	1	11	13	
872	72.7	Asbestos fabric	1	12	14	
873	68.3	Drug store goods	1	8	9	See Appendix No 4
874	27.6	Groceries, except those listed separately	1	10	12	
875	27.6	Gastronomic goods, except those listed separately	1	10	12	
876	61.1	Toluene, oil and coal	2	12	14	See Appendix No 4
877	72.8	Tar paper, asbestos	4	12	14	
878	72.1	Roofing tar paper	9	c.c.	c.c.	
879	5.7	Tomato, puree and paste	5	12	14	
880	32.1	Diesel fuel	6	c.c.	c.c.	See Section VII, Subsection 20

1	2	3	4	5	6	7
881	31.3	Peat, in chunks and cut up	9	12	14	
882	4.1	Medicinal herbs	1	6	7	
883	42.1	Tractors	3	7	8	
884	46.2	Transformers	4	7	8	
885	74.1	Knitted fabric	1	6	7	
886	42.1	Seed separators	3	7	8	
887	68.5	Trinitrophosphate	6	10	12	
888	44.2	Trolley buses, assembled	1	3	3.5	
889	44.1	Trolley buses, disassembled	4	7	8	
890	36.7	Asbestos-cement pipes	8	13	15	
891	30.1	Asphalt pipes	2	c.c.	c.c.	
892	38.4	Clay pipes	8	c.c.	c.c.	
893	57.1	Wooden pipes	8	12	14	
894	40.3	Iron pipes	7	16	18	
895	36.5	Reinforced concrete pipes, and parts	9	c.c.	c.c.	
896	52.1	Rags, all kinds of, including leather, sheepskin, rubber and cord articles.	6	10	12	
897	43.1	Turbines	3	7	8	
898	64.1	Fertilizers	10	c.c.	c.c.	
899	35.2	Tuff, natural and artificial	10	c.c.	c.c.	
900	60.1	Carbon, activated	6	c.c.	c.c.	
901	17.2	Charcoal	6	6	7	
902	31.1	Coal, all kinds	9	c.c.	c.c.	
903	60.1	Wood vinegar	6	12	14	
904	27.4	Wine vinegar, plain	1	12	14	
905	62.5	Ultramarine (paint)	1	11	13	
906	57.3	Plywood, glued	9	14	16	
907	57.1	Veneer, not glued	8	12	14	
908	40.3	Bridge girders and parts	7	16	18	
909	38.2	Ferrovanadium	8	c.c.	c.c.	

1	2	3	4	5	6	7
910	38.2	Ferrotungsten	8	c.c.	c.c.	
911	38.2	Ferromanganese	8	c.c.	c.c.	
912	38.2	Ferrosilicyl	8	c.c.	c.c.	See Supplement No 4
913	38.2	Ferroalloys	8	c.c.	c.c.	
914	39.2	Films	4	7	8	
915	6.5	Pistachio nuts	2	10	12	
916	38.2	Fluxes	10	c.c.	c.c.	
917	61.1	Formalin	2	12	14	See Supplement No 4
918	64.1	Phosphorites, concentrated	10	c.c.	c.c.	
919	14.1	Silk frieze	1	8	9	
920	6.5	Fruit: etiolated, pickled, fermented, dried	2	10	12	
921	6.2	Fruit and berries, all kinds, fresh and frozen	3	6	7	
922	1.1	Bread grain, all kinds	7	c.c.	c.c.	
923	2.1	Cotton, all kinds, and cotton by-products	5	12	14	
924	68.2	Chlorine, liquid, hermetically sealed	2	12	14	See Appendix No 4
925	4.1	Hops	1	6	7	
926	46.2	Refrigerators, electric	4	7	8	
927	49.2	Canvas	1	10	12	
928	49.1	Canvas: paper, flax, flax-hemp	1	11	13	
929	60.1	Chrome, acetate of (in solution)	6	12	14	
930	60.1	Chrome, acetate of, dry	6	c.c.	c.c.	
931	58.3	Cellulose (wood pulp)	7	14	16	
932	2.1	Cellulose, cotton	5	12	14	
933	72.7	Cellophane	1	12	14	
934	2.1	Cellofiber (artificial cotton)	5	12	14	
935	11.1	Cellofiber (artificial wool)	4	8	9	
936	35.1	Construction cement, all kinds	9	c.c.	c.c.	

1	2	3	4	5	6	7
937	27.5	Chicory	1	10	12	
938	41.1	Corrugated zinc	3	c.c.	c.c.	
939	39.1	Zinc, raw	4	c.c.	c.c.	
940	27.6	Tea, green and brick	1	10	12	
941	27.5	Tea, artificial	1	10	12	
942	36.4	Roofing tile, clay	8	c.c.	c.c.	
943	36.5	Tile, cement, and cement-concrete	9	c.c.	c.c.	
944	38.1	Cast iron, crude	8	c.c.	c.c.	
945	21.7	Champagne	1	15	18	
946	40.1	Ball bearings, steel	7	c.c.	c.c.	
947	49.1	Silk (cloth)	1	11	13	
948	14.1	Silk, raw	1	8	9	
949	18.3	Wood wool	8	10	12	
950	11.1	Wool, artificial, except that listed separately	4	8	9	
951	11.1	Animal wool, all kinds (goat, sheep, camel, etc)	4	8	9	See Appendix No 4
952	36.7	Slate, artificial (tile, asbestos-cement, Eternit)	8	13	15	
953	10.1	Squirrel, sheep, rabbit, wolf, goat, hare, etc, skins and pelts, unprocessed: (a) Dry and frozen (b) Wet-salted	1	6	7	See Appendix No 4
954	55.1	Sheepskins, processed	1	10	12	
955	53.1	Hides, processed: bull, buffalo, ox, horse, cow, seal, pig, etc	1	12	14	
956	47.1	Dross, cinders, scoria, sinter, and ashes, all kinds	10	c.c.	c.c.	
957	16.1	Cross ties, wooden	9	15	18	
958	40.1	Cross ties, iron, steel, and cast iron	7	c.c.	c.c.	
959	35.2	Light feldspar (anhydrite), calciferous, in chunks	10	c.c.	c.c.	

1	2	3	4	5	6	7
960	33.1	Fluospar (fluorite)	9	c.c.	c.c.	
961	33.1	Heavy spar (barite)	9	c.c.	c.c.	
962	58.1	Spools, paper	6	14	16	
963	41.2	Typesets, printing	3	c.c.	c.c.	
964	29.1	Castor plant grist (extracts)	7	14	16	
965	40.1	Widegage screws, iron and steel	7	c.c.	c.c.	
966	38.2	Strips, metal	8	c.c.	c.c.	
967	35.2	Gravel	10	c.c.	c.c.	
968	16.1	Shingles, roofing	9	15	18	
969	11.2	Bristle, all kinds	1	8	9	
970	57.1	Panels, wooden	8	12	14	See Appendix No 4
971	75.1	Panels, for construction purposes (pressed straw and pressboard)	4	6	8	
972	45.1 b	Excavators, on their own supports'	13	=	=	
973	43.1	Excavators, unsupported	3	7	9	
974	70.1	Exhibits, for exhibitions	1	6	7	
975	63.2	Tanning extracts	3	10	12	
976	62.1	Paint extracts	1	12	14	
977	27.5	Fruit and berry extracts	1	10	12	
978	60.1	Electrode material (bulk)	6	c.c.	c.c.	
979	46.4	Electrodes, all kinds, for galvanic elements	2	15	18	
980	27.4	Fruit essence	1	12	14	
981	71.2	Jewelry articles, all kinds	1	10	12	
982	6.1	Apples	8	8	9	
983	6.5	Berries: sun-cured, pickled and fermented, and raisins	2	10	12	
984	6.2	Berries and fruit, all kinds, fresh and frozen	3	6	7	

1	2	3	4	5	6	7
985	6.4	Nut meats, including almond meats	1	11	13	
986	19.1	Whole buckwheat	7	c.c.	c.c.	
987	13.1	Eggs of domestic and wild fowl	2	10	12	
988	1.1	Barley	7	c.c.	c.c.	
989	57.1	Boxes, wooden, for packing	8	12	14	
990	40.2	Boxes, iron	3	6	7	

PART (B)

INDUSTRIAL NOMENCLATURE OF FREIGHT -- INDEX OF NOMENCLATURE GROUPS

Group Numbers	Type of freight by group	Page
I	II	III
	AGRICULTURAL PRODUCTS	
I. Field, Vegetable and Truck-Garden Produce		
1	Wheat grain and seeds	102
2	Fibrous plant materials	102
3	Tobacco	102
4	Live and dry plants	102
5	Vegetables and mushrooms, fresh and processed, except those canned in hermetic containers	103
6	Fruits and berries, fresh and processed, except those canned in hermetic containers, and nuts	103
II. Animals, Animal, Fowl, and Game Products		
7	Live animals and fowl	103
8	Bees and beekeeping products	104
9	Meat shipments (including all kinds of dressed fowl), except canned meat in hermetic containers, animal fats, and meat scraps	104
10	Hides, skins and furs, unprocessed	104
11	Animal wool, bristles, hair, down, feathers and artificial wool	105
12	Dairy products, except those canned in hermetic containers	105
13	Eggs	105
14	Silk products, natural and artificial	105

I**II****III****III. Fish Products**

- | | | |
|-----------|---|------------|
| 15 | Fish, all kinds, and crustaceans | 105 |
|-----------|---|------------|

IV. Forestry Products

- | | | |
|-----------|--|------------|
| 16 | Construction and all-purpose lumber | 106 |
| 17 | Firewood and charcoal | 106 |
| 18 | Lumber shipments, (except those listed in groups 16 and 17) | 106 |

INDUSTRIAL PRODUCTS**V. Foodstuffs Industry Products**

- | | | |
|-----------|--|------------|
| 19 | Flour, groats and malt | 106 |
| 20 | Vegetable oils | 106 |
| 21 | Ethyl alcohol and alcoholic drinks | 107 |
| 22 | Nonalcoholic beverages and ice | 107 |
| 23 | Sugar | 107 |
| 24 | Starch-syrup products | 107 |
| 25 | Tobacco products | 107 |
| 26 | Confectionery and bakery products | 108 |
| 27 | Groceries and gastronomical goods | 108 |
| 28 | Canned goods in hermetic containers | 108 |
| 29 | By-products of the foodstuffs industry, oil mills, and fodder products made from them | 108 |

VI. Products of the Mining and Silicate Industry

- | | | |
|-----------|---|------------|
| 30 | Asphalt and asphalt products | 108 |
| 31 | Solid mineral fuel, peat and manure | 109 |
| 32 | Oil shipments | 109 |
| 33 | Ores | 109 |
| 34 | Salt | 109 |
| 35 | Construction materials made of minerals, plain, unfinished, and rough-hewn stone | 109 |
| 36 | Clay, stone, cement, concrete, and reinforced concrete products | 109 |
| 37 | Glass, porcelain, and faience products | 110 |

I	II	III
	VII. Products of the Metallurgical and Metals-Processing Industry	
38	Cast iron, iron, and steel, crude	110
39	Nonferrous metals and their alloys, crude	111
40	Iron, steel and cast iron products	111
41	Nonferrous metal and alloy products	111
42	Agricultural machines and equipment, parts and appliances	111
43	Machines, all kinds, except agricultural, and parts and ap- pliances	112
44	Transportation equipment	112
45	Items moved on own wheels	112
46	Electrotechnical products, mechanical precision instruments, and intricate apparatuses and instruments	112
47	Cinders, scoria, and dross	113
	VIII. Textile Industry Products	
48	Wool cotton, thread and yarn	113
49	Textile products	113
50	Canvases, sacks, and cloth covers	113
51	Ropes and hemp products	113
52	Rags	114
	IX. Leather and Fur Industry Products	
53	Hides and skins, processed	114
54	Leather products	114
55	Finished and unfinished furs, processed	114
56	Bristle and hair products	114
	X. Woodworking Industry Products	
57	Wooden articles	114
	XI. Products of the Paper and Polygraphics Industry	
58	Pulp, paper, and cardboard	115
59	Printed books, polygraphic productions, office supplies, and study aids	115

I

II

III

XII. Chemical Industry Products

60	Products of basic chemical industry (acids, salts, alkali)	115
61	Products of the coke-benzol industry and wood pulp-chemical industry	116
62	Paints and paint stuffs	117
63	Tanning raw material and products	117
64	Fertilizers	117
65	Matches	117
66	Products of the bone-processing and soap-making industries	117
67	Raw materials and products of the rubber industry	118
68	Gases, chemico-pharmaceutical products, and perfumes and cosmetics	118

XIII. Products of other Industries

69	Haberdashery	118
70	Visual study aids, musical instruments, and sporting, hunting, and theatrical properties and appliances, games and toys	118
71	Valuable articles	118
72	Insulating, polishing, buffing, and roofing articles	119
73	Footwear	119
74	Clothing, underwear and bedding	119
75	Articles made of reeds, basket willow, bast, fiber, twigs, straw and similar materials	120
76	House furnishings, traveling and household articles	120

Nomenclature of freight

1

Class of transit freight	Rated Weight Norms for cars		
	under 20 t	20-25 t	20-25 t
2	3	4	

AGRICULTURAL PRODUCTS**I. Field, Vegetable, and Truck-Garden Produce****Group 1: Wheat grain and seeds**

1. Grain (wheat, rye, oats, barley, and other grains), rice, 7 c.c. c.c.
olive, and other seeds except those listed in item 2

2. Vegetable, flower, tea, and medicinal herb seeds 1 10 12

Group 2: Fibrous plant materials

1. Cotton, all kinds, and all cotton shipments 5 12 14

2. Jute, gambo hemp, Indian hemp, finished hemp, flax,
ordinary hemp and wastes, carding and flaxing scraps 4 10 12

3. Plant fibers, except those listed separately 4 7 8

Group 3: Tobacco

1. Tobacco leaf, yellow (for cigarettes) and black (for cigars) 4 9 11

2. Tobacco leaf, plain (for makhorka)

Group 4: Live and dry plants

1. Alga, all kinds, and medicinal plants 1 6 7

2. Roots: sweet flag, licorice, soap bark tree, lichen,
all kinds of moss, juniper berries and medicinal roots,
except those mentioned separately 1 6 7

3. Hay and straw, all kinds (including hemp and flax straw)

- and fermented fodder grass (silaged): 9 5 6

- (a) in box cars 9 5 6

- (b) on flat cars and other open cars 9 10 12

4. Reeds, stinging nettle, wormwood, reed mace, and cane 4 6 7

5. Live trees and shrubs, vegetable seedlings, all sorts
of saplings and other planting materials, evergreen
plants, fresh and cut flowers 1 6 7

6. Fuller's teasel 1 4 5

	1	2	3	4
7. Bark, stalks and roots of rubber plants, dry plants, and parts, except those listed separately		1	10	12
		1	10	12

**Group 5: Vegetables and mushrooms, fresh and processed,
except those sealed in hermetic containers****A. Fresh vegetables and mushrooms**

1. Cucumbers and cabbage	7	10	12
2. Potatoes	8	c.c.	c.c.
3. Beetroots and beetroot shavings	8	c.c.	c.c.
4. Onions, table and fodder beets, radishes, and turnips	7	12	14
5. Other fresh vegetables and mushrooms	7	6	7

B. Processed vegetables and mushrooms

6. Mushrooms, dried and in oil	1	60	7
7. Pickled vegetables and mushrooms, all kinds, vegetable jam and puree	5	18	14
8. Vegetables and mushrooms: salted, fermented, pickled, sun-cured and precooked as well as dried vegetables	5	10	12

**Group 6: Fruits and berries, fresh and processed, except
those canned in hermetic containers, and nuts****A. Fresh fruits and berries**

1. Apples	8	8	9
2. Other fresh fruits and berries	3	6	7
3. Nuts, all kinds, fruit and berry kernels and copra	2	10	12

B. Processed fruits and berries

4. Olives, dried, pickled and in oil, as well as nut meats and fruit kernels	1	11	13
5. Other fruits and berries: sun-cured, pickled, fermented, dried and sulfitized	2	10	12
6. Fruit and berry jam, puree and paste	4	12	14

**II. ANIMALS AND ANIMAL PRODUCTS,
POULTRY AND WILD GAME PRODUCTS****Group 7: Live animals and fowl**

1	2	3	4	5
1. Large horned cattle and horses, young stallions, camels, hinnies, mules, donkeys, domestic reindeer and ponies		3	4	5
2. Small domestic animals and cattle (rams, ewes, goats, lambs, calves, pigs, piglets, etc)		3	4	5
3. Wild animals		1	4	5
4. Fowl, domestic and game, all kinds		1	4	5
<u>Group 8: Bees and beekeeping products</u>				
1. Bees in hives and other types of housing		1	4	5
2. Wax		1	11	13
3. Bee honey and wax waste		1	15	18
<u>Group 9: Meat shipments (including all sorts of dressed fowl), except meat canned in hermetic containers, animal fats, and meat scraps</u>				
1. Animal meat in any shape, dressed fowl, glands		2	8	9
2. Meat and meat-vegetable mixtures canned, in glass jars		4	10	12
3. Bones: plain, raw, calcined, and ground, horns and hoofs, horn and hoof chips and shavings, all kinds of meat by- products and blubber		6	10	12
4. Albumin, all kinds		1	10	12
5. Intestines, all kinds		4	12	14
6. Animal and fowl lard and fat: (a) In refrigerator cars		2	10	12
(b) In box cars		2	14	16
<u>Group 10: Hides, skins and furs, unprocessed</u>				
1. Unprocessed skins and hides, all kinds, and scraps of them. Unprocessed furs and pelts and scraps of them: badger, squirrel, chipmunk, wolf, hare, cat, rabbit, rat, letyag, bear, sea animal, mice, sheep, perevozhik, solongay, dog, gopher, marmot, jerboe, hamster and jackal:				

	1	2	3	4
(a) dry and frozen		1	6	7
(b) wet-salted		2	c.c.	c.c.
2. Other furs, unprocessed		1	6	7
3. Scraps, raw		1	6	7
<u>Group 11:</u> Animal wool, bristles, hair, down, feathers, and artificial wool				
1. Animal wool, all kinds, as well as artificial wool		4	8	9
2. Hair and bristle, all kinds		1	8	9
3. Animal down, bird feathers and down, all kinds		1	5	6
<u>Group 12:</u> Dairy products, except those canned in hermetic containers				
1. Milk, all kinds except powdered milk, potted cheese all kinds, curdled milk, and whey		1	8	9
2. Sour cream and sweet cream		1	8	9
3. Powdered milk and cheese		1	10	12
4. Animal oil and dairy products, except those listed separately		1	10	12
<u>Group 13:</u> Eggs				
1. Domestic and game bird eggs, in any shape, except those shipped in hermetic containers		2	10	12
<u>Group 14:</u> Silk products, natural and artificial				
1. Cocoons, raw silk and other silk products		1	8	9
2. Artificial silk fiber		1	5	6
III. FISH PRODUCTS				
<u>Group 15:</u> Fish, all kinds, and crustaceans				
1. Fresh caviar and fish fry		1	6	7
2. All kinds of live fish, fresh and frozen fish as well as fish oil and fresh fish wastes		1	10	12
3. All kinds of sturgeon and dried and salted fish, jirim, black caviar, mollusks, lobsters and crabs, smoked fish: flounder, salmon, rybets, whitefish, eel, shemaya, and small aquarium fishes		1	11	13

	1	2	3	4
4. Fish cords (spinal)		1	10	12
5. Caviar, all kinds, except black		1	15	18
6. Fish, except those listed separately, sun-cured, smoked, salted and pickled; herring, all sorts, except fresh; fish meal, (purified), and all kinds of fish scrap except fresh		5	15	18
7. Dried fish		5	10	12

IV. FORESTRY PRODUCTS

Group 16: Construction and all-purpose lumber

1. Construction and all-purpose lumber materials of all sizes, names, and types of lumber, except bamboo	9	15	18
2. Bamboo	9	12	14

Group 17: Firewood and charcoal

1. Firewood, all kinds	9	14	16
2. Charcoal	6	16	7

Group 18: Lumber shipments (except those listed in Groups 16 and 17)

1. Cork bark, tree excrescences, and nodes	1	7	8
2. Tree roots and stumps, brushwood, twigs, tannin wastes, and other by-products of natural tannins	8	14	16
3. Other lumber shipments	9	10	12

INDUSTRIAL PRODUCTS

V. Foodstuffs industry products

Group 19: Flour, groats and malt

1. All kinds of groats and flour, except those coming under different groups, malt and corn seedlings, malt and oatmeal	7	c.c.	c.c.
---	---	------	------

Group 20: Vegetable oils

1. Vegetable oils, all kinds, drying oil, residue, and wastes of vegetable oils	4	12	14
---	---	----	----

1	2	3	4
---	---	---	---

2. Margarine, combined and compound fat, margoguselin,
and artificial shortening made from vegetable oils 1 10 12

Group 21: Ethyl alcohol and alcoholic beverages

1. Ethyl alcohol, raw, denatured, and redistilled	4	12	14
2. Potato spirit, purified and unpurified, distillation, and other wastes	4	12	14
3. Beer and ale	1	10	12
4. Honey and fruit and berry wines	3	15	18
5. Grape wines (except champagne), grape juices, and must	3	11	13
6. Cognac, brandy, liqueur, and other alcoholic beverages, except those listed separately, as well as grain vodka	1	15	18
7. Champagne	1	15	18

Group 22: Nonalcoholic beverages and ice

1. Plain water	12	-	-
2. Tea	12	-	-
3. Mineral drinks, natural and artificial, and non- alcoholic beverages, all kinds	4	c.c.	c.c.

Group 23: Sugar

1. Sugar, all kinds	3	c.c.	c.c.
2. Molasses and sugar-refining wastes	4	c.c.	c.c.

Group 24: Starch-syrup products

1. Starch, all kinds, potato flour, and other starch- syrup products	4	c.c.	c.c.
---	---	------	------

Group 25: Tobacco products

1. Tobacco, except makhorka, processed and cut, and tobacco products	1	6	7
2. Tobacco, plain (makhorka), cut and rubbed, and makhorka cigarettes	4	10	12

1	2	3	4
---	---	---	---

Group 26: Confectionery and bakery products

1. Confectionery and fruit and berry jam and syrup	1	c.c.	c.c.
2. Macaroni and bakery products, except confectionery	1	10	12
3. Cakes, pastry, and confectionery toast	1	10	12

Group 27: Groceries and gastronomical goods

1. Mustard, dry condensed soups, soybean, horseradish, sunflower seeds	1	10	12
2. Yeast, all kinds, except wine yeast	1	8	0
3. Coffee, natural	1	15	8
4. Vinegar, vinegar alcohol and essence, fruit and berry essence	1	12	14
5. Laurel leaves, fruit drinks, berry and grain drinks, dry; chicory, all kinds, coffee, tea, and cocoa substitutes	1	10	12
6. All kinds of tea, spices, and groceries and gastronomical products, except those listed separately	1	10	12

Group 28: Canned goods in hermetic containers

1. Canned goods, all kinds	4	c.c.	c.c.
----------------------------	---	------	------

Group 29: By-products of the foodstuffs industry and oil mills as well as fodder products made from them

1. Grape, roots and seeds residues, mixed and preserved fodder, bran and other flour by-products as well as by-products of the foodstuffs industry and oil mills, all kinds	7	14	16
---	---	----	----

VI. MINING AND SILICATE INDUSTRY PRODUCTSGroup 30: Asphalt and asphalt products

1. Asphalt, petroleum asphalt, and asphalt stone, all kinds of asphalt articles, kirs (solidified petroleum, mineral wax) and raw ozocerite	8	c.c.	c.c.
---	---	------	------

Group 31: Solid mineral fuel, peat and manure

1. Coal shipments, all kinds except coke and coke grounds	9	c.c.	c.c.
2. Coke, except peat and oil coke, coke grounds	9	14	17
3. Peat in any shape, manure, and oil shale	9	12	14

1

2 3 4

Group 32: Oil shipments

- | | |
|---|-------------|
| 1. Petroleum asphalt, solid and liquid (aciduous), all kinds of mazut, waste lubricating oil, all sorts of crude oil and residues, oil, caustic and acid waters (including soap naphtha, catalyst and acidol), semi-petroleum asphalt, tar and oil residues, tractor fuel, and white spirit | 5 c.c. c.c. |
| 2. Kerosene, purified and unpurified, ligroin | 5 15 18 |
| 3. Benzine, lubricating oil, petroleum grease and other products, except those mentioned separately, mixtures of petroleum products with vegetable and animal oils | 4 15 18 |

Group 33: Ores

- | | |
|---|-------------|
| 1. Ores, all kinds, ore concentrates, iron pyrites, and floatation residues (pyrites) | 9 c.c. c.c. |
| | 9 c.c. c.c. |

Group 34: Salt

- | | |
|---|-------------|
| 1. Rock salt, all kinds of table salt, sea salt | 7 c.c. c.c. |
|---|-------------|

Group 35: Construction materials made of minerals, plain unfinished and wrought-hewn stone

- | | |
|--|--------------|
| 1. Construction cement, all kinds | 9 c.c. c.c. |
| 2. Clay and soil, all kinds (except coloring), construction stone unfinished and rough-finished, in chunks and crushed, mica and pumice stone fines, marl, gravel, sand, lime, binding construction materials, and solutions, except those mentioned separately, talcum powder and coquina | 10 c.c. c.c. |
| 3. Pumice stone and mica chips, pinched and pressed | 8 12 14 |
| 4. Asbestos in chunks and powder | 7 14 16 |

Group 36: Clay, stone, cement, concrete and reinforced concrete products

- | | |
|---|---------|
| 1. Bottles, demijohns, clay dishware, muffle colors, and clay ornaments, chamotte and clay converters and crucibles | 3 12 14 |
|---|---------|

1	2	3	4
2. Varnished construction materials: brick, plates, tiles, and other artificial and natural stone products		3	c.c. c.c.
3. Andesite products, whetstones in bars, plates, and wheels, graphite crucibles		3	c.c. c.c.
4. Concrete, except asbestos concrete, millstones, slag and chamotte stones, all kinds of brick except fire- proof, chamotte and porcelain mass, unvarnished construc- tion materials made of natural stone, all kinds of clay pipes, florus, clay and slate tile		8	c.c. c.c.
5. Artificial stone construction products: alabaster, gypsum, lithoide, cement, concrete and reinforced con- crete, refractory brick		9	c.c. c.c.
6. Other artificial and natural stone articles (clay, graphite, chamotte, etc., including metal parts), except those listed separately		3	c.c. c.c.
7. Asbestos-cement tiles (artificial slate, Eternit), asbestos-cement pipes, and plates	8	13	15

Group 37: Glass, porcelain, and faience products

1. Bottles, carboys, demijohns, and glass dishes, glass lamp chimneys	2	6	7
2. Glass, porcelain, and faience breakage	3	c.c. c.c.	
3. Sheet glass, except that listed separately, pressed glass, soluble glass, glass mass, and powder	3	15	15
4. Glass, porcelain, faience and crystal products, except those mentioned separately	2	6	7
5. Mirror glass, all kinds, mirrors and porcelain and glass insulators	2	15	18

VII. PRODUCTS OF THE METALLURGICAL AND METALS-PROCESSING INDUSTRY**Group 38: Cast iron, iron and steel, raw**

1. Cast iron bars, iron and steel ingots, iron and steel blocks approximately 100x100 mm cross section and over, as well as blooms, slabs, and sheet bars	8	c.c. c.c.
---	---	-----------

	1	2	3	4
		8	c.c.	c.c.
2.	Rolled iron and steel, all profiles, including those with nonferrous metal plating, iron and steel blocks of less than 100x100 mm, iron and steel rolled wire, ferroalloys, and all kinds of rails			
3.	Iron, steel and cast iron breakage, chips, scrap, shavings, dust, etc	10	c.c.	c.c.

Group 39: Nonferrous metals and their alloys, crude

1.	Lead, zinc, aluminum, duraluminum, metal magnesium, copper, antimony, and alloys of these metals: printing, babbitt, bronze, brass, tombac, and other nonferrous metals and alloys in ingots, bars, rods, rolled metal, shavings and scrap, metal cement	4	c.c.	c.c.
----	--	---	------	------

Group 40: Iron, steel, and cast iron products

1.	Tin, cast iron, iron and steel articles, hand tools, cutlery, black metal ovens and field kitchens, non-insulated black metal wire and hardware	7	c.c.	c.c.
2.	Iron and tin dishware, including enameled dishes, control and measuring instruments, black metal tare and netting	3	6	7
3.	Metal objects, all kinds of pipes and accessories	7	16	18

Group 41: Nonferrous metal and alloy products

1.	Zinc, corrugated	3	c.c.	c.c.
2.	Lead and zinc products, all kinds, and printing typesets	3	c.c.	c.c.
3.	Nonferrous metal dishware, tare, and meshwork	3	6	7
4.	Other nonferrous metal products and alloys	3	c.c.	c.c.

Group 42: Agricultural machines and equipment, parts, and appliances

1.	Agricultural machinery and equipment both disassembled and assembled, as well as their parts and appliances and equipment for fruit gardening, vegetable planting, poultry-raising, beekeeping, and dairy farming; small agricultural implements except those listed separately	3	7	8
----	---	---	---	---

1

2 3 4

Group 43: Machines, all kinds, except agricultural and their parts and appliances

1. Machines, apparatuses, motors, and machine tools for industrial equipment, construction, irrigation, fire-fighting, and parts; all kinds of machines and parts for handicraft production 3 7 8

Group 44: Transportation equipment

1. Transportation equipment, disassembled and their parts 4 7 8
2. Transportation facilities, assembled: automobile and bus bodies, railroad cars, and ship hulls 1 3 3.5

Group 45: Items moved on own wheels

1. Transportation equipment and other objects moved on own wheels:
- | | | | |
|--|----|---|---|
| (a) railroad cars, flat cars, tank cars, and tenders | 11 | - | - |
| (b) locomotives with and without tenders | 12 | - | - |
| (c) other objects | 13 | - | - |

Group 46: Electrotechnical products, mechanical precision instruments, and intricate apparatuses and instruments

1. Storage batteries (with galvanized plates), electrical fittings 2 14 16
2. Generators, electric motors, dynamo-electric machines, rheostats, transformers, and parts 4 7 8
3. Electric heating devices 1 10 12
4. Carbon and graphite electrodes, pressed carbon for galvanic elements 2 15 18
5. Calculating machines and typewriters and parts and appliances, electronic and mechanical precision devices, except those listed separately 1 11 15
6. Weighing scales, all kinds, parts of scales and small scales, flashlights 1 6 7
7. Electric bulbs 1 15 18
8. Cables, all kinds 1 c.c. c.c.
9. Insulated wire, all kinds 1 c.c. c.c.
10. Radio sets and accessories, motion picture cameras and

1

2 3 4

accessories and medical, physical, photographic, and surgical equipment and parts, large and small insulated and metal-coated pipes

Group 47: Cinders, scoria and dress

1. Cinders, scoria, dress, cuttings, and sweepings of
all kinds 10 c.c. c.c.

VII. TEXTILE INDUSTRY PRODUCTS

Group 48: Wool cotton, thread and yarn

1. Silk cotton, silk and wool thread, silk and wool yarn 1 11 13
2. Embroidering, knitting, and sewing paper, wool cotton,
all kinds of thread except that listed in item 1, all
kinds of yarn except that listed in items 1 and 3, and
cotton rags
3. Flax cotton, odd bits of any kind of yarn, flax, hemp
and cord yarn, old rags, coarse jute, and hemp material
on specie 1 10 12
4. Wool cotton 1 3 3.5

Group 49: Textile products

1. Cotton, wool, jute, flax and hemp cloths, silk and
synthetic fiber cloth; wool, cotton and rubberized
industrial belting, all kinds, and textile products
except those mentioned in item 2 1 11 13
2. Machine-printed cloth, cloth bits and cuttings no more
than 100 cm in size, tents, sails, canvas, canvas fire
and water hoses, canvas, packing, and filter press
cloths 1 10 12

Group 50: Canvases, sacks, and cloth covers

1. Canvas sacks, coarse material haversacks and bags
and canvas covers 1 10 12

Group 51: Ropes and hemp products

1

2 3 4

1 10 12

1. Ropes, all sorts except those grouped under item 2, binder materials (twine and string, all kinds), cord rugs and mats, hemp and cord belts, nets for sports purposes, fishing and ship's gear, and handbags made of rope

2. Cotton and wool ropes, heavy and light, rope articles except those mentioned separately

Group 52: Rags

1. Rags, all kinds, as well as old and torn leather, sheepskin, rubber and cord objects

6 10 12

IX. LEATHER AND FUR INDUSTRY PRODUCTS**Group 53: Processed hides and skins**

1. Processed hides and skins, all kinds as well as artificial hide and pressed hide

1 12 14

2. Leather shreds, cuttings, chips, and shavings including leather scrapings and powder

1 6 7

Group 54: Leather products

1. Leather articles, all kinds (also mixed with other materials), except those mentioned separately

1 10 12

Group 55: Finished and unfinished furs, processed

1. Sheepskins, finished and unfinished

1 10 12

2. Cuts of raw-processed sheepskins and marmot pelts

1 10 12

3. Cuts of dry sheepskins and marmot pelts

1 6 7

4. Processed fur and odds and ends of all sorts of fur except that mentioned separately

1 6 7

Group 56: Bristle and hair products

1. Felt and felt products, all kinds except footwear

1 10 12

2. All kinds of bristle and hair articles

1 6 7

X. WOODWORKING INDUSTRY PRODUCTS**Group 57: Wooden articles**

1	2	3	4
---	---	---	---

1. Any kind of wooden article which is not mentioned separately, all kinds of parquet and parquet laths, single-layer veneer, woodstone, fibrolites and articles made from them, and wooden crating 8 12 14
2. Cork and cork articles except those mentioned separately 1 6 7
3. Parts of prefabricated frame houses, disassembled frame houses and other structures, and plywood 9 14 16

XI. PRODUCTS OF THE PAPER AND POLYGRAPHICS INDUSTRY

Group 58: Pulp, paper, and cardboard

1. Paper, all kinds, cardboard except corrugated, asbestos and roofing cardboard, all sorts of paper and cardboard articles 6 14 16
2. Wastepaper and paper trash 6 6 7
3. Paper pulp, all kinds, and cellulose 7 14 16
4. Corrugated cardboard 2 8 9

Group 59: Printed books, polygraphic productions, office supplies, and study aids

1. Books and magazines, frameless polygraphic production, printed study aids 6 10 12
2. Office and accounting supplies, hand-painted pictures and drawings, framed polygraphic productions and manuscripts, films, motion picture, photographic, and x-ray film 4 7 8

XII.CHEMICAL INDUSTRY PRODUCTS

Group 60: Products of the basic chemicals industry (acids, salts, alkali)

1. Products of the basic chemicals industry: acids, salts, and alkali, except those listed separately in item 2 and in other groups:
 - (a) In liquid form 6 12 14
 - (b) In dry form 6 c.c. c.c.

1

2 3 4

2. Magnesium sulfate, raw; used gas-purifying material, residues from nitric acid production, residues from sulfuric acid production, saponite, sulfate of ferric oxide, Glauber salt, iron salts (vitriol), strontianite (carbon strontium) unpurified, sulfate from the copper-processing industry, sulfite pulp, thenardite, lime and minerals for mud baths (natural brine) 6 c.c. c.c.

Group 61: Products of the coke-benzol industry and wood pulp-chemical industry

- | | |
|--|---------|
| 1. Carbolic acid, purified; creosol, purified; creolin, wood cellulose, lysol, light coal oil (including hydrocarburant, lignite, and light lignite), naphtha solvent, toluene and formalin | 2 12 14 |
| 2. Anthracene, glycerine, all kinds of black oil, soft resin, carburizer, unpurified carbolic acid, caterpillar glue (tar and lime mixture), unpurified creosol, unpurified creosote, coal varnish, heavy coal oil, anthracene, creosote and naphthalene oils, artificial drying oil, wax tar, all kinds of liquid tars, except those mentioned separately, saturation compounds, retort carbon, and pine extracts | 3 14 16 |
| 3. Pitch, galipot, harpolin (rosin): coal, stearin and peat asphalt, iditol, tar acid, rosin glue, ketone oil, pine tar, and turpentine | |
| 4. All kinds of gum except those mentioned separately, carbolite, pinoline (volatile tar oil), saccharin, rosin tar, chewing gums, natural and aromatic gums and shellac, cherry and tar glue | 1 10 12 |
| 5. Plant wax, natural gum, all kinds, and dry (except those mentioned separately) ceresins | 1 12 14 |

1

2 3 4

4 12 14

6. Acetone, acetone, ketone and methyl solvents,
 amyl alcohol (amyl acetate), butyl alcohol (butyl
 acetate) and methyl alcohol (methyl acetate)

7. Sealing wax 1 c.c. c.c.

Group 62: Paints and paint stuffs

- | | | | |
|---|---|------|------|
| 1. All kinds of putty, mordants, and driers, chrom paints,
and dye extracts | 1 | 12 | 14 |
| 2. Mineral dyes and dyestuffs, zinc paints, lead and litho-
pone paints, black printer's ink | 1 | c.c. | c.c. |
| 3. Chalk and ocher in chunks and in powder, silicate dyes,
mineral dyestuffs diluted in water or in paste form | 6 | c.c. | c.c. |
| 4. Semimanufactures of the aniline dyes industry | 1 | 10 | 12 |
| 5. Other dyestuffs, not listed separately, and varnish
and composition | 1 | 11 | 13 |
| 6. Aniline dyes | 1 | 11 | 13 |
| 7. Carbon black | 4 | 7 | 8 |

Group 63: Tanning raw material and products

- | | | | |
|--|----|------|------|
| 1. Tanning bark, all kinds, and other natural tannins | 4 | 12 | 14 |
| 2. Artificial tannins and tanning extracts except those
listed separately | 10 | c.c. | c.c. |

Group 64: Fertilizers

- | | | | |
|-------------------------------------|----|------|------|
| 1. Fertilizers, mineral and organic | 10 | c.c. | c.c. |
|-------------------------------------|----|------|------|

Group 65: Matches

- | | | | |
|-----------------------|---|---|---|
| 1. Matches, all kinds | 1 | 7 | 8 |
|-----------------------|---|---|---|

Group 66: Products of the bone-processing and soap industries

- | | | | |
|---|---|----|----|
| 1. All kinds of dressing and sizing, blue, bone, gluestock,
painter's, shoemaker's, carpenter's, keratin, and fur coat | 1 | 10 | 12 |
| 2. Glue, all kinds except that mentioned separately, liquid
glue in bottles and tubes | 1 | 10 | 12 |

	1	2	3	4
3. Plain soap, solid and liquid, including medicinal soap and soap in special small containers		2	c.c.	c.c.
4. Toilet and medicinal soap in bars, as well as toilet liquid soap and soap powder, all sorts of tallow candles, candle ends, and stearin		2	12	14

Group 67: Raw materials and products of the rubber industry

1. Balata, gutta percha, rubber, ebonite, celluloid and articles made from them (except haberdashery and footwear), as well as scrap ebonite and celluloid articles, auto, motorcycle and bicycle tires	1	10	12
---	---	----	----

Group 68: Gases, chemico-pharmaceutical products, and perfumes and cosmetics

1. Hydrogen peroxide, carbon bisulfide, and carbon chloride	2	c.c.	c.c.
2. Gases: compressed, liquefied and dissolved under pressure	2	12	14
3. Chemico-pharmaceutical products, drugs, hygiene materials	1	8	9
4. Perfumes and cosmetics except those mentioned separately	1	11	13
5. Disinfecting, deodorizing, anti-incrustation, and fire-fighting equipment and insect-exterminating equipment	5	10	12

XIII. PRODUCTS OF OTHER INDUSTRIESGroup 69: Haberdashery

1. Haberdashery and needle work articles, all kinds	1	11	13
---	---	----	----

Group 70: Visual study aids, musical instruments, sporting, hunting, and theatrical properties and appliances, games and toys

1. Visual study aids, except printed ones, musical instruments and parts, sporting, hunting, and theatrical equipment and appliances, all sorts of games and toys, exhibits for exhibitions	1	6	7
	1	6	7

Group 71: Valuable articles

1. Seal tusks, ivory, reindeer horns, and other valuable raw materials	1	10	12
2. Jewelry and other valuable articles	1	10	12

2 3 4

1

<u>Group 72:</u> Insulating, polishing, buffing, and roofing articles	9	c.c.	c.c.
1. Artificial asbestos, cardboard, and roofing sheets (except asbestos), rubberoid roofing, insulating peat plates, plywood with peat separators, hemp tubing insulation	1	10	12
2. Buffing paper, cloth and powder, sand paper, and emery paper etc, polishing stone, cementite, and ceresite	4	10	12
3. Non-heat-conducting products made of asbestos, cork and fiber glass, and other asbestos products except those listed separately, and heat-insulation materials	4	10	12
4. Fireproof compounds, all kinds	1	10	12
5. Compounds and pastes for polishing metal, glass, and leather, etc	4	14	16
6. Asbestine, asbestos (natural), asbozurit, asbotermit, asbestos concrete, asbestos fiber and felt, asbestos cords and ropes; insulating materials: flaked asbestos, asbestos-mica and asbestos-cement; by-products, cuttings, chips, breakage of casein plastic (halalith) and articles made from it, filler powders used for plastics	1	12	14
7. Insulating articles and materials, except those mentioned separately; plastics except those mentioned separately, and articles made from them (except haberdashery) and breakage and chips of such articles	4	12	14
8. Asbestos board, sheeting, and panels	4	8	10
9. Heat insulating slag wool, plates, and blocks	2	6	7

Group 73: Footwear

1. Footwear, all kinds, including felt footwear	1	6	7
<u>Group 74: Clothing, underwear, and bedding</u>			
1. Clothing and underwear finished and semi-finished, all kinds, bedding except that listed under item	2	6	7
2, head gear			

1	2	3	4
---	---	---	---

2. Pillows, blankets, and mattresses filled with down,
feathers, or hair 1 4 5

Group 75: Articles made of reeds, basket willow, bast,
fiber, twigs, straw, and similar materials

1. Reed, basket willow, twig, and straw products, all kinds, except furniture	4	6	7
2. Soaked bast and bast fiber products, all kinds	5	6	7

Group 76: Household furnishings, traveling and household
articles

1. Furniture and iron, steel, cast iron and wire beds, iron bedsprings	4	8	10
2. Wooden furniture, all kinds, dismantled or otherwise, and articles of furniture not mentioned separately	1	5	6
3. Knapsacks and bags, except those made of canvas and tarpalin, brief cases, grips, suit cases, and other traveling accessories of all materials	1	6	7
4. Household articles	6	5	6
